Unyime Kona

Front-End Engineer

unyimeusen01@gmail.com | Lagos,Nigeria | github.com/Unyime94 | linkedin.com/in/unyimekona/

Skills

Programming Languages
HTML, CSS, Javascript

Libraries & Frameworks
React, Redux Toolkit, Next.js, Tailwind CSS

Tools & Platforms
Git, Github, Firebase, Sanity.io, Netlify, Vercel

Education

Stutern
Frontend Development (2022)

FreeCodeCamp
Javascript Algorithm and Data Structures (2022)

University of Benin, Nigeria
B.Eng - Electrical/Electronic Engineering (2016)

Projects

Squazzle Web App

A Progressive Web App (a collaborative project) that helps users list and rent homes available for short-lets.

React, Tailwind CSS, Firebase

- o Implemented pixel-perfect and responsive User Authentication UI components.
- o Implemented algorithms for User Authentication and Protected Routing.
- o Implemented clean and responsive UI components for listing an accommodation.
- o Implemented algorithms for backend integration of listing accommodation, amongst other tasks.

Ecommerce Web App

A tech accessories e-commerce application integrated with Stripe for e-payment transactions.

Next.js, CSS, Sanity.io, Stripe, Vercel

- o Built clean and responsive UI components with Next.js.
- o Implemented a secure Data Management System using Sanity.io.
- o Designed and implemented a State Management System using React Context API.
- o Implemented algorithms to integrate Stripe for managing e-payment transactions.

Cart Feature for an E-commerce App

A prototype of a cart feature for an e-commerce app.

React, Redux-Toolkit, CSS

- o Designed and built the UI component using React.
- o Implemented an algorithm to fetch data from an API containing user data.
- o Built a State Management System using Redux -Toolkit.
- o Implemented algorithms to display, delete and add items selected for purchase in the cart.

Leads-Tracker Chrome Extension

A chrome extension to locally save leads and open browser tabs.

HTML, CSS, Javascript

- o Designed and implemented UI components using HTML and CSS.
- o Implemented an algorithm to check the user's current open tab in the browser.
- o Implemented algorithms to save, render and delete users' leads as per user interaction.

Interests

UI Design, Software-Engineering, Painting, Reading.
